Engineering Division**

**Anacapa and Carrillo
Intersection Improvement Project Update
December 2012**

The City of Santa Barbara's contractor, Lash Construction, will be implementing temporary lane closures on Anacapa Street between Figueroa Street and Canon Perdido Street as part of the Anacapa and Carrillo Intersection Improvement Project. Temporary lane closures will be in effect from Monday, December 3 to Thursday, December 6 from approximately 6:30 am to 3:30 pm. The closures are necessary to conduct emergency underground utility repairs. One traffic lane will be maintained at all times for traffic travelling south on Anacapa Street. Turning restrictions onto Carrillo Street will be required and the traveling public should expect delays. Sidewalk and pedestrian access will not be significantly affected by the work.

The work also includes trenching, laying of conduits, and paving the trenches across Anacapa Street as necessary for the installation of new traffic signals. The City Engineer has approved this work during the holiday moratorium due to the emergency nature of the work. The completed work will allow for the removal of the temporary steel plates. Future work will be halted until after the first of the year. Please contact Adam Hendel, Supervising Engineer, at 805-897-1921 or ahendel@santabarbaraca.gov, with questions.

The Public Works Department appreciates the public's patience during this temporary inconvenience.
